

ABSOLUTE PLUMBING has been servicing a large area of North Brisbane for over 8 years, specialising in all domestic maintenance. Their team of 8 experienced tradesman, 2 budding young apprentices and 3 helpful office staff lead by Managing Director, Russell Mahon pride themselves on customer service and quality work. The high standards run throughout the organisation, from using the best products and materials in the market to ensuring their work with a 12 month guarantee. This attention to detail results in customer satisfaction and it is these attributes that make Absolute plumbing ideal installers of the Hydrotherm Heat Pumps.

Absolute Plumbing offer the best & most modern products on the market, with this in mind we asked Russell his views on energy efficient products and this is what he had to say:

'The products will become the Norm. As the prices of our utilities go up, more and more customers will look for the most cost effective (which in the main is the most energy efficient) solutions to their household appliances.'

Russell sees the energy efficient products as the future and has invested his time in identifying the best products out there. This lead him to the Hydrotherm, so if you are interested in having the future of hot water in your home please visit the Absolute website: www.absoluteplumbingqld.com.au or contact them on (07) 3205 1100.

Key areas that ABSOLUTE Plumbing cover are: 4500, 4011, 4012, 4021, 4053
