TERMITES

What you can do to help reduce the risk in your home!

- ✓ Repair any leaking taps, hose lines and water heaters Internally and externally.
- ✓ Avoid fixing wood to exterior walls.
- ✓ Trim and clear any dense foliage near house foundations.
- ✓ Keep any firewood stored outside and raised off the ground, away from your house perimeter.
- ✓ Don't place mulch or wood chips up against house walls or foundations.
- ✓ Clean leaves and branches from gutters and drains.
- ✓ Have water runoff from down pipes and air-conditioner unit diverted away from your homes foundations.
- ✓ Don't have wood in direct contact with any soil.
- ✓ Remove any fallen branches, wood and excess leaves from your yard. Do not bury wood in your yard.

The above precautions as well as having a Termite Prevention Program such as a Termite Barrier around your home installed in conjunction with Annual Termite inspections is the best way to keep your home safe.
